

EUPHRASIA CANADENSIS IN VERMONT.—In Bulletin No. 3 (1908) of the Vermont Botanical Club, Professor M. L. Fernald called attention to the fact that *Euphrasia canadensis*, unknown in Vermont, occurs in the White Mountain region and had recently been found by Judge Churchill near the Vermont boundary in Quebec. It will, therefore, interest Vermont botanists to know that the plant is quite abundant in hillside pastures in parts of Richford, Montgomery and Enosburg. I have sent specimens to Mr. G. L. Kirk of Rutland.—FRANCIS H. SARGENT, Wolfeboro, New Hampshire.

*Vol. 25, no. 292, including pages 49 to 68, was issued 9 April, 1923.*
